Passage 1

People are often killed while crossing the road. Most of them are old people and children. Old people are often killed because they usually can't see or hear very well. Children are often killed because they are careless.

A car, truck or bus can't stop very quickly. If a car is going very fast, it will travel many meters before it stops. People don't understand this. They think a car can stop within a few meters. The faster a car is traveling, the

longer it needs to stop. It is very hard for a person to know how fast a car is traveling.

The only safe way to cross the road is to look both ways, right and left. When the road is clear, it's safe to cross. The correct way to cross the road is to walk quickly. It's not safe to run. If people run across the roads, they may fall to the ground.

Newspapers, along with reporting the news, educate, entertain, and give opinions. An important way of reading a large, big-city newspaper is to put it into different sections. Can you find these separate sections: world news, national and local news, sports, business, entertainment, opinions, ads? Does your newspaper have other sections?

News stories give facts, not the reporters' opinions. Some newspaper editorials (社论) come out with the writer's name, but many newspapers only carry editorials without putting the writers' names on.

You can be a better reader if you know what to expect in a newspaper. For example, you can expect headlines (新闻标题) to leave out unnecessary words. You can expect to find the most important facts in the lead paragraph (the first paragraph) of a news story. You can expect important news items to be on the front page. You can expect less important items to be on the inside pages.

Most of all, the more you know about news of the present time, the more you will understand what is in the newspaper. Important stories are generally presented one day and followed up on following days. So, an important way to read newspapers is reading one frequently.

"How much does it cost for the whole day?" the man asked. "100 dollars," said the taxi-driver. This was very expensive, but the man said it was OK.

The taxi-driver took the man everywhere. He showed him all the parks and museums in the city. In the evening, they went back to the hotel. The traveler gave the taxi-driver 100 dollars and said, "What about tomorrow?" The taxi-driver looked at the man and said, "Tomorrow? It is another 100 dollars." But the man said, "That's OK! See you tomorrow." The taxi-driver was very pleased.

The next day, the taxi-driver took the traveler everywhere again. They visited all the parks and museums again. And in the evening, they went back to the hotel. When John and Victoria Falls arrived in New York City for one-year stay, they did not bring very many things with them. They had planned either to live in a furnished apartment or to buy used furniture. But they soon learned about a new system that more and more people are using. The renting of home furnishings (bed, tables, dishes, and so on) has become one of America's fastest growing businesses.

What kinds of people rent their home furnishings instead of buying them? People who are international business or government officials, foreign students, airline workers, young married couples-people whose job or

business may force them to move frequently from one city to another. They save a lot of trouble and the cost of moving their furniture each time. Passage 9

A characteristic of American culture that has become almost a tradition is to respect the self-made man-the man who has risen to the top through his own efforts, usually beginning by working with his hands. While the leader in business or industry or the college professor occupies a higher social position and commands greater respect in the community than the common laborer or even the skilled factory worker, he may take pains to point out that his father started life in America as a farmer or laborer of some sort.

This attitude toward manual (体力的) labor is now still seen in many aspects of American life. One is invited to dinner at a home that is not only comfortably but even luxuriously (豪华地) furnished and in which there is every evidence of the fact that the family has been able to afford foreign travel, expensive hobbies, and college education for the children; yet the hostess probably will cook the dinner herself, will serve it herself and will wash dishes afterward; furthermore, the dinner' will not consist merely of something quickly and easily

assembled from contents of various cans and a cake or a pie bought at the nearby bakery. On the contrary, the hostess usually takes pride in careful preparation of special dishes. A professional may talk about washing the car, digging in his flowerbeds, painting the house. His wife may even help with these things, just as he often helps her with the dishwashing. The son who is away at college may wait on table and wash dishes for his living, or during the summer he may work with a construction gang on a highway in order to pay for his education.

Passage 10

How men first learnt to invent words is unknown; in other words, the origin of language is a mystery. All we really know is that men, unlike animals, somehow invented certain sounds to express thought and feelings, actions and things, so that they could communicate with each other; and that later they agreed upon certain signs, called letters, which could be combined to present those sounds, and which could be written down. Those sounds, whether spoken or written in letters, we call words.

The power of words, then, lies in their associations-the things they bring up before our minds. Words become filled with meaning for us by experience; and the longer we live, the more certain words recall to us the glad and sad events of our past; and the more we read and learn, the more the number of words that mean something increases.

Great writers are those who not only have great thoughts but also express these thoughts in words which appeal powerfully to our minds and emotions. This charming and telling use of words is what we call literary style. Above all, the real poet is a master of words. He can convey his meaning in words which sing like music and which by their position and association can move men to tears. We should therefore learn to choose our words carefully and use them accurately, or they will make our speech silly and vulgar.

D. a weak point of shy people

53. That shy people react to a compliment in such a way is _____.

Passage 12

In the United States, it is not customary to telephone someone very early in the morning. If you telephone him early in the day, while he is shaving or having breakfast, the time of the call shows that the matter is very important and requires immediate attention. The same meaning is attached to telephone calls made after 11:00 pm. If someone receives a call during sleeping hours, he assumes it's a matter of life or death. The time chosen for the call communicates its importance.

In social life, time plays a very important part. In the U. S. A. guests tend to feel they are not highly regarded if the invitation to a dinner party is extended only three or four days before the party date. But it is not true in all countries. In other areas of the world, it may be considered foolish to make an appointment too far in advance because plans which are made for a date more than a week away tend to be forgotten. The meaning of time differs in different parts of the world. Thus, misunderstandings arise between people from different cultures that treat time differently. Promptness is valued highly in American life, for example. If people are not prompt, they may be regarded as impolite or not fully responsible. In the U. S. no one would think of keeping a business associate waiting for an hour, it would be too impolite. A person, who is 5 minutes late, will say a few words of explanation, though perhaps he will not complete the sentence.

C. it makes no difference in the U. S. whether you are early or late for a business party.
D. if a person is late for a date, he needn't make some explanation.

Passage 13

There are three kinds of goals: short-term, medium-range and long-term goals.

Short-term goals are those that usually deal with current activities, which we can apply on a daily basis. Such goals can be achieved in a week or less, or two weeks, or possibly, months. It should be remembered that just as a building is no stronger than its foundation, long-term goals cannot amount to very much without the achievement of solid short-term goals. Upon completing our short-term goals, we should date the occasion and then add new short-term goals that will build on those that have been completed.

The intermediate goals build on the foundation of the short-term goals. They might deal with just one term of school or the entire school year, or they could even extend for several years. Any time you move a step at a time, you should never allow yourself to become discouraged or overwhelmed. As you complete each step, you will enforce the belief in your ability to grow and succeed. And as your list of completion dates grow, your motivation and desire will increase.

Long-term goals may be related to our dreams of the future. They might cover five years or more. Life is not a static thing. We should never allow a long-term goal to limit us or our course of action.

61. Our long-term goals mean a lot _____.

C. if we have dreams of the future D. if we put forward some plans

- A. a daily basis B. your achievement in a week
C. current activities D. the goals that have been completed

63. When we complete each step of our goals, _____.

- A. we will win final success B. we are overwhelmed
C. we will build up our confidence to achieve success
D. we should have strong desire for setting new goals

64. What is the main idea of this passage? _____

- A. Life is a dynamic thing.
- B. We should set up long-term goals.
- C. Different kinds of goals in life.
- D. The limitation of long-term goals.

65. Which of the following statements is wrong according to the passage? _____

- A. The long-term goals cannot amount to very much without achieving short-term goals.
- B. The intermediate goals build on the foundation of the short-term goals.
- C. Life is a static thing, thus never allowing a long-term goal to limit us.
- D. We should often add new short-term goals to what have been completed.

Passage 14

What makes a person a scientist? Does he have ways or tools of learning that are different from those of others? The answer is "no". It is not the tools a scientist uses but how he uses these tools that make him a scientist. You will probably agree that knowing how to use a power is important to a carpenter. You will probably agree, too, that knowing how to investigate, how to discover information, is important to everyone. The scientist, however, goes one step further, he must be sure that he has a reasonable answer to his questions and that his answer can be confirmed by other persons. He also works to fit the answers he gets to many questions into a large set of ideas about how the world works.

The scientist's knowledge must be exact. There is no room for half right or right just half the time. He must be as nearly right as the conditions permit. What works under one set of conditions at one time must work under the same conditions at other times. If the conditions are different, any changes the scientist observes in a demonstration must be explained by the changes in the conditions. This is one reason that investigations are important in science. Albert Einstein, who developed the theory of relativity, arrived at this theory through mathematics. The accuracy of his mathematics was later tested through investigations, and Einstein's ideas were shown to be correct. A scientist uses many tools for measurements. Then the measurements are used to make mathematical calculations that may test his investigations.

66. What makes a scientist according to the passage? _____

- A. The tools he uses.
- B. The way he uses his tools.
- C. His ways of learning.
- D. The various tools he uses.

67. The underlined part in the passage shows _____.

- A. the importance of information
- B. the importance of thinking
- C. the difference between scientists and ordinary people
- D. the difference between carpenters and people with other jobs

68. A sound scientific theory should be one that _____.

- A. works not only under one set of conditions at one time, but also under the same conditions at other times
- B. does not allow any changes even under different conditions
- C. can be used for many purposes
- D. leave no room for improvement

69. The author quotes the case of Albert Einstein to illustrate _____.

- A. that measurements are keys to success in science
- B. that accuracy of mathematics

- C. that investigations are important science
- D. that the mathematical calculations may test his investigations

70. What is the main idea of the passage? _____

- A. The theory of relativity.
- B. Exactness is the core of science.
- C. Scientists are different from ordinary people.
- D. Exactness and ways of using tools are the keys to the making of a scientist.

Passage 15

Many people who work in London prefer to live outside it, and to go in to their offices or schools every day by train, car or bus, even though this means they have to get up early in the morning and reach home late in the evening.

One advantage of living outside London is that houses are cheaper. Even a small flat in London without a garden costs quite a lot to rent. With the same money, one can get a little house in the country with a garden of one's own.

Then, in the country one can really get away from the noise and hurry of busy working lives. Even though one has to get up earlier and spend more time in trains or buses, one can sleep better at night and during weekends and on summer evenings, one can enjoy the fresh, clean air of the country. If one likes gardens, one can spend one's free time digging, planting, watering and doing the hundred and one other jobs which are needed in a garden. Then, when the flowers and vegetables come up, one has got the reward together with those who have shared the secret of Nature.

Some people, however, take no interest in country things. For example, happiness lies in the town, with its cinemas and theatres, beautiful shops and busy streets, dance-halls and restaurants. Such people would feel that their life was not worth living if they had to live outside London. An occasional walk in one of the parks and a fortnight's (two weeks) visit to the sea every summer is all the country they want: the rest they are quite prepared to leave to those who are glad to get away from London every night.
